Announcement

Anti Roll Bar Bushes

Changes to the way you buy

Due to customer demand and overwhelming feedback on our Anti Roll Bar Bush range, we are taking steps to implement a new full range of kits.

Effective immediately FAI will no longer sell these products as single part numbers but instead, **packed in pairs**.

This is designed to be **more convenient** for you and your customer.

To make the process simple, we will be taking the existing bush part number and **adding a K suffix** to denote the new kit number. **For example, SS2190 will become SS2190K.**

Old part numbers will be superseded by the new K number so any enquiries on our online catalogue, MAM and TecDoc will **automatically redirect you**, providing you with accurate information and an uninterrupted service.
