STATEMENT OF QUALITY POLICY

FAI Automotive plc sources, procures, stores, packs and distributes replacement automotive parts under an all-makes programme with the FAI and Camtec brands, covering European, Japanese and Korean passenger cars and light commercial vehicles.

The Directors are committed to maintaining a registered Quality Management System that meets the requirements of ISO 9001:2008.

We place particular emphasis on obtaining customer satisfaction by:

- Treating customers with respect and in a professional manner.
- Responding promptly and accurately to customers' enquiries and orders.
- Maintaining and improving on the quality of the products and services that the Company supplies to its customers.
- Ensuring that management and staff are trained to meet the requirements of the Company and its customers.
- Constantly striving to meet and where possible exceed customers' expectations.

We operate by setting objectives and targets for the Quality Management System. Management periodically reviews achievements against these objectives and targets and continually seeks to improve the effectiveness of the system and enhance customer satisfaction.

Our Quality Management System is defined in the Quality Manual, Quality Operating Procedures, and supporting documents.

This Quality Policy is communicated to and understood by personnel within the Company. It is periodically reviewed for continuing suitability to satisfy the needs of the Company, customers, other interested parties, and ISO 9001.

Signed: 
Sean Walker
Managing Director

Issue 1

CERTIFICATE

Management system as per
BS EN ISO 9001 : 2008

In accordance with TÜV UK Ltd procedures, it is hereby certified that

FAI Automotive plc
The Chiltern Trading Estate
Grovebury Road
Leighton Buzzard
Bedfordshire
LU7 4TU
United Kingdom

applies a management system in line with the above standard for the following scope:

FAI Automotive plc sources, procures, stores, packs and distributes replacement automotive parts under an all-makes programme with the FAI and Camtec brands, covering European, Japanese and Korean passenger cars and light commercial vehicles.

Certificate No.: GB00454

Audit Report No.: 2014/08763

Signed for and on behalf of TÜV UK Ltd,
the Certification Body

Valid until: 21/06/2017

Initial certification: 22/06/2005

London, 28/05/2014

This certificate, which remains the property of TÜV UK Ltd, was issued in accordance with the TÜV UK Ltd auditing and certification procedures as amended from time to time and its validity is subject to regular surveillance audits.

Introduction

Our ever expanding range of cables mainly consists of brake cables, but now also includes selected and fast moving clutch and gear shift cables.

We currently offer over 300 part numbers, covering in excess 6,000 applications for both cars and light commercial vehicles, with excellent coverage for Ford, Renault, Nissan VAG, Vauxhall and many more.

As you would expect from FAI, our quality is exceptional, with each cable being 100% proof load-tested and of matching OE quality and specifications. All materials used have been certificated to ensure they meet the required specification of ISO 9002.

Our on-line catalogue includes reference drawings for cable types and the location of positioning on the vehicle in question, to help you make an easy identification.

Benefits

- 250 cover around 90% of pareto - 6000 applications.
- Competitive pricing.
- Manufactured to OE specifications.
- 100% load tested.
- Great packaging.
- All materials have been certificated to ensure they meet required specification of ISO 9002.
- Carriage benefits, customer can add to their order.

Brake Cables

How does a hand brake cable work?

Just like any other system in your car your brakes rely on all its components working perfectly in order to stop your car from moving. The hand brake works in the same way except you pull on your hand brake instead of stepping on the pedal. When you pull on your hand brake the lever engages your cars hydraulic braking system with the help of your brake cable.

Why do hand brake cables need to be changed?

It starts with a small crack in the outer brake cable. The polymide cover disintegrates with water and dirt ingress, this causes corrosion and the outer diameter of the cable expands, which means that the cable cannot slide freely anymore.

Most car owners with automatic transmission forget or neglect to use their hand brake when they park their vehicles, they have the idea that the gear is sufficient to hold the vehicle. The hand brake is required to activate the rear braking system which in turns keeps the rear brakes adjusted. Not using the hand brake can lead to a build up of corrosion on the cable resulting in its failure to function.

Most common failures

The hand brake cannot be released which can lead to

- Overheating brakes
- Grinding noise high wear and tear
- In the worst case the car will not move

Less common failure

- No hand brake function

Finding a suitable replacement

At FAI the brake cables are made to OE specifications so it is designed specifically for your make and model, You need a strong and durable cable FAI's cables are 100% load tested and all materials have been certificated to ensure they meet the required specification of ISO 9002. You need a cable that has rust prevention – with FAI brake cables all componentry is galvanised and where specified by OE the inner wire has a nylon cover. FAI,s cables are also competitively priced and are supplied in great packaging.

Gear Shift Cables

Gear shift failure

Gear shift cables are an integral part of the vehicle they link the gear lever to the transmission. Both manual and automatic vehicles are fitted with gear shift cables. You will know when the cable has failed as there will be excessive play in the gear lever, pressure on gear change or forced gear changes.

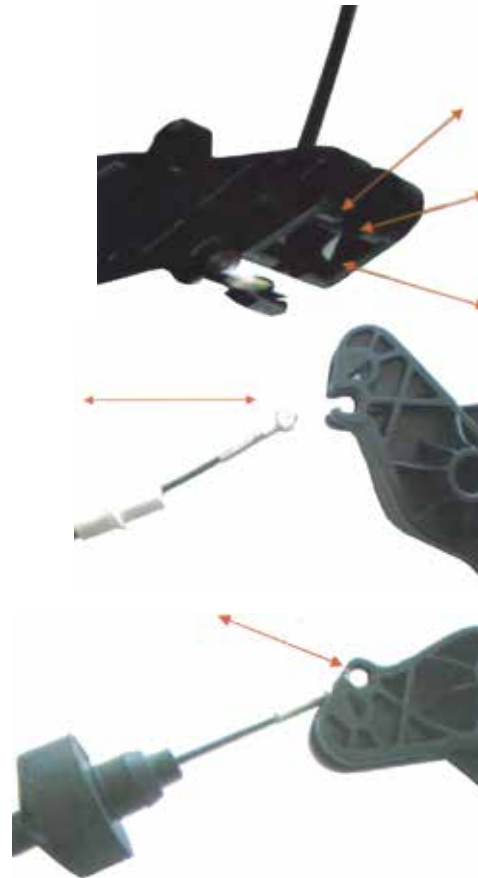

Clutch Cables

Auto adjust fitment

To avoid the possibility of cable failure, be careful not to insert the cable end fitting into the square cavity situated above the housing end fitting.

The end fitting housing must be perfectly clean before fitting the cable to the pedal.

The cable end fitting must move freely inside its housing.
